What is available? The Qubit product range has deliberately been kept compact and simple. Each item has been generated from a specific unit proportion for the benefit of storage, deployment and visual continuity.

The current available lines are:

<i>Qubit:</i>	<i>Low</i>	<i>High</i>	<i>Tall</i>	<i>Long</i>
	Seat	Bar Seat	Bar Table	Dining Table

Who uses Qubit? While Qubit will integrate well in many domestic and commercial environments, it is ideally suited to the following applications; on cruise ships and in hotels, restaurants, galleries, museums, and design-led retailers.

What is Qubit? Qubit is a range of commercial-grade, weatherproof furniture that focuses on the strength of its core materials giving superior durability in the harshest of environments.

Why Qubit? Qubit has been designed to achieve a balance between strength, functionality and contemporary design. Using leading edge technology and cutting edge materials Qubit sets the standard in commercial indoor/outdoor furniture design.

Where is Qubit used? Conceived and built for marine use, Qubit has exceeded expectations during vigorous trials where durability, balance and functionality were tested in the most demanding of conditions.

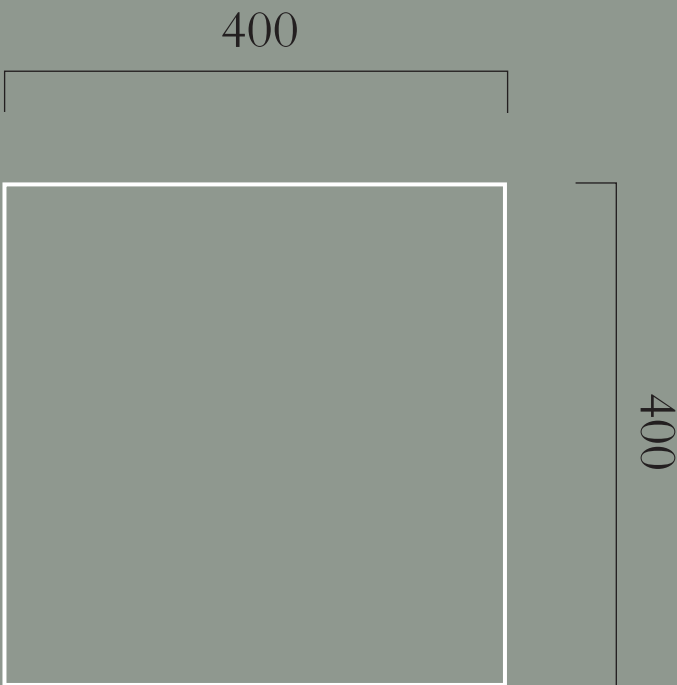

What makes Qubit unique? While the basic core structure of Qubit gives it qualities of toughness, stability and lightness, there are some clever refinements that make Qubit remarkably flexible, giving the customer the ability to customise and create their own individual design. This same process makes ongoing maintenance and refitting a simple task. By using an uncompromising approach to the base materials, the design achieves a clean, contemporary look and an elegant and timeless proportion.

What will yours be like?

Upholstery, inserts and other componentry can be customised or themed.
